

BIZFON™

Phone System

Make the *move* to a better phone system.

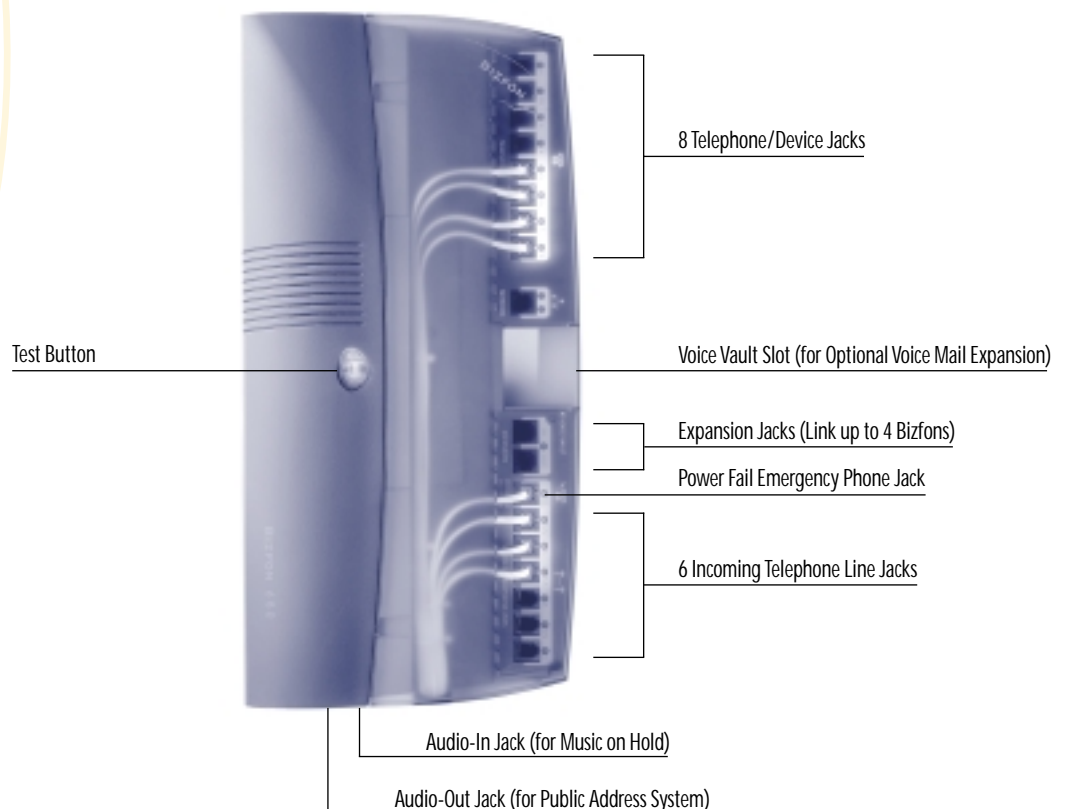

CAPABILITIES SUMMARY

The Bizfon 680 is the control unit of the Bizfon telephone system. Its unique combination of call handling, voice mail, remote access and customer care features provides small businesses like yours with the power you need to transform the way you communicate—among your employees, and with your customers. It enables you to be more available to customers, more informative about your products and services, and more responsive to customer needs.

For the first time, a full-featured phone system for small businesses is available at a price virtually any small business can afford.

Key Features

- Connects up to six telephone lines to a total of eight physical extensions and fifteen virtual extensions
- Voice Mail, with nine private mailboxes, and user-friendly automated attendant are built-in as standard features
- Allows users to mix our BizTouch feature phones with conventional analog, corded and cordless phones
- Enables users to use any remote telephone as if it were directly connected to the Bizfon System
- Instant access to the Bizfon Customer Care Center simply by dialing extension 299
- Scale the Bizfon incrementally and seamlessly to support your growth, up to 24 telephone lines and 32 extensions
