

BIZFÖN™

BizTouch2 Feature Phone

Make the *move* to a better phone system.

BizTouch2 Phone

For Single-User Voice Communications

The BizTouch2 is designed for employees who don't need to see the status of other phones in the office or store, but require sophisticated voice communications. The BizTouch2 gives you all of the following features:

Features

- One-touch toggling between two calls
- Visual indicator light for voice mail messages and incoming calls
- One-button access to voice mail
- Transfer calls to any phone (in or out of the office), or if the line is busy, directly into voice mail
- Custom program each phone for speed dial numbers
- Use display panel to show Caller ID, duration of call, time and date, and other useful information
- Use handset, speakerphone, or headset
- Conference up to three (internal or external) callers together
- Pick up any phone from any extension, or place a call on hold and pick it up at another extension

BizTouch2 Specifications

Voice Mail – One-button access to your private voice mailbox

Caller ID (requires telephone company service) – Displays incoming call information; displays extension to extension call information

Call Waiting – Allows incoming calls to be picked up by pressing the “Call 2” button while you are speaking on another line
